

Freelancers wanted for various manual tasks!

Requirements:

Do you have previous craft or construction experience and aren't afraid to lend a hand? Relevant previous experience could be experience in the construction sector, or from DIY projects and repair work (e.g. working with wood or metal). We would be so grateful for your support to our ecological cultural institution. Possible areas of work are exhibition set-up and take-down, outdoor work, repair work on the E-WERK building and much more.

About E-WERK:

E-WERK Luckenwalde has an ecologically and economically innovative model: regenerative art electricity is produced here, which feeds into the building and the public grid. As a non-profit institution, the E-WERK reinvests all income from energy production in its quarterly program of contemporary art and cultural events. E-WERK Luckenwalde is the world's first arts and culture center to generate co2-neutral electricity with its own production. E-WERK Luckenwalde is located in a former coal-fired power plant built in 1913, which ceased production after the fall of the Berlin Wall. It is located 30 minutes south of Berlin and is co-managed by Pablo Wendel and Helen Turner. For more information about E-WERK Luckenwalde, visit www.kunststrom.com.

What we offer you at E-WERK Luckenwalde: A great international and interdisciplinary team, lunch together every working day, as well as valuable insights into creative and innovative approaches to renewable energy and the cultural sector.

Feel free to contact us at info@kunststrom.com and let us know what previous experience you have and how often you would be available to work. The payment will depend on your experience. We are looking forward to your message!
